

The enterprise **Zavod Sloistyh Plastikov** was founded in 1945 in Leningrad (St Petersburg), Russia. The company has always been guided by the principles of high quality products and new developments to improve or diversify its product range.

**Zavod Sloistyh Plastikov** is one of the largest industrial producers of decorative high-pressure paper-based plastic laminate sheets, also called HPL plastic, used for the interior design of various premises, as facade plastic for exterior finishing in the system of suspended ventilated facades, postforming laminates for manufacturing kitchen facades and table tops as well as for transport interior decoration.

High quality of our products is approved by the international standard for a quality management system ISO 9001: 2015.

architectural  
forms

HPL SLOPLAST EXTERIOR SOLUTIONS is decorative self-bearing high-pressure plastic used for external finishing, in particular, in the system of suspended ventilated facades. It is resistant to mechanical impacts, aggressive impacts of the external environment, has unique heat insulating properties.

HPL SLOPLAST INTERIOR SOLUTIONS is multi-functional material used for interior design of public and industrial premises, which are to meet the requirements of wear resistance, hygienic and excellent aesthetic properties. It is also used to decorate walls, office premises, retail and entertainment complexes.

# SLOPLAST IN FURNITURE

HPL POSTFORMING Interior is used for production of furniture and interior design elements

We offer a solution for decoration of countertops, kitchen cabinets, offices, childrens' rooms and specialised furniture

# SLOPLAST IN TRANSPORT

HPL Sloplast fire-resistant is used in transport segment. Due to its property of being not easily combustible (flammability class G1), the material is intended for the interior decoration of public transport vehicles - metro vans, passenger railway cars, and other means of transportation.

# SLOPLAST BIOCIDAL

SLOPLAST Biocidal (HPL) used for exterior and interior decoration is a modern material whose decorative surface shows resistance to mechanical damage, ultraviolet radiation, and aggressive environmental impact.

# SLOPLAST LAB

Sloplast LAB is decorative paper-laminated plastic with surface resistant to aggressive environments

Perfect for laboratory furniture

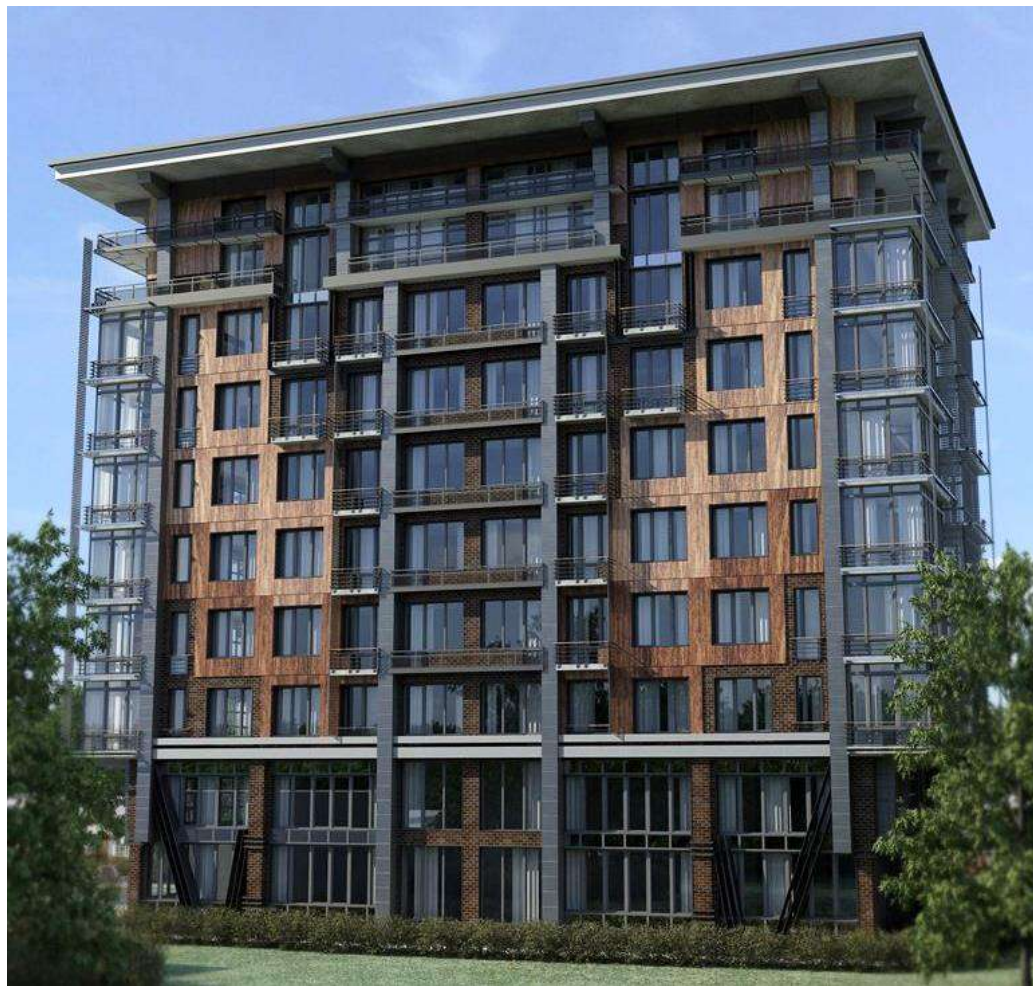

Perfect for professional  
countertops with enhanced  
chemical safety, for clean rooms
